# Leadership Development Advantage<sup>SM</sup>

## **Cultural transformation requires you revolutionize your organizational processes and your talent resources.**

By facilitating group leadership growth or providing one on one training, we help you become **ADEPT<sup>SM</sup>** at the business of healthcare. Whether managing people and time effectively or strengthening your abilities in articulate communication, we provide the essential skills needed for resilient leaders in today's medical care environment.

**Mentoring.** Our programs link an employee or cadre with a mentor who will focus on several essential modalities highly regarded in today's healthcare environment, including personal effectiveness, organizational leadership, and business management. This is typically a longer-term, consistent and curriculum-driven program that is custom-designed for your needs.

**Coaching.** V2V can also coach an employee or group to improve performance on the job in a specific area of focus by either enhancing current skills or acquiring new skills. We can develop both a curriculum and assessment tool to measure training effectiveness without a long lead time for implementation.

**Seminars and Workshops.** You may be planning a multi-day conference, an 8-hour retreat or leadership meeting. These offer opportunities to impart transformational concepts and foster a culture of resiliency and engagement.

V2V's training, mentoring, and coaching curriculum offers the support you need to ensure your leadership team becomes **ADEPT<sup>SM</sup>** at driving significant financial and operational improvements, while delivering rapid, certain, and sustainable results. We offer experienced counsel to enhance practice and network performance.

*We focus on value, so you can focus on care.*
