Performance AdvantageSM

We are facing a transformation in health care. The race to restore declining revenue in our industry has become a full-time endeavor. How do you create sustainability in such a dynamic and changing environment? It starts with evaluation of the current state in both practice operations and financial performance. We will help you become **ADEPTSM** at the business of health care by identifying your greatest opportunities for improvement.

Financial Performance. Financial performance is so much more than accounts receivable. V2V's team uses key indicators, including your revenue profile, fee analysis, and production to evaluate processes and identify gaps. Concurrently, we review your patient accounts for gross vs. net collections, A/R aging, and your payer mix.

Operational Performance. This aspect of our assessment provides a clear understanding of the overall status of your business operations in comparison to a number of key industry standards. This offers a clear pathway to discovering next steps in the strategic decision-making process as well as development of business goals that ensure successful sustainability.

A thorough evaluation of your business operations, governance, financial performance, and risk management determines the opportunities for delegation, restructure, and focus. You will learn what is working and what is not.

V2V starts the successful transformation of your organization with a clear understanding of the current state of operations. The "**Performance AdvantageSM**" assessment will help you find the greatest value within processes or initiatives to improve both financial and operational performance. We address your needs effectively, expeditiously, and as always, in a fiscally responsible manner. Are you ready? We will help.

We focus on value, so you can focus on care.
